

Purchasing Policy Statement

Company policy ensures environmentally protective purchase and supply activities in support of waste reduction methods such as purchasing in bulk to reduce excessive packaging.

Management encourages recycling initiatives and the use of non-disposable equipment on board its vessels.

The company's relations with its suppliers are characterized by mutual trust, understanding and honesty, and we prioritize the procurement of environmentally friendly products when available.

Suppliers receive comprehensive information regarding mandatory standards, price and quality, service and deliveries, including delivery irregularities.

Each vessel maintains an optimal spare part inventory, taking into consideration necessary stock for spare parts for critical equipment.
